(54) CONTROL INSECT PEST AND CONTAINER USED THEREFOR

(57)Abstract:

PURPOSE: To economically exterminate insect pests by putting a solution of repellent in a container, oozing the solution of repellent from the top of the container, linearly applying the solution to a desired face to be coated and making insect pests not pass through the linear part.

CONSTITUTION: A solution 2 of repellent such as N,N-diethyl-meta-toluamide or N-butylacetanilide is poured into a main body of a flexible container 1 having a brushing member 3 at the top, the solution 2 of repellent is oozed from the top of the container 1, the solution of repellent is linearly applied to a desired face to be coated by the brushing member 3, insect pests are made not to pass through the linear part and insect pests are kept away from a divided zone having the linear part as one side of that insect pests can be economically exterminated by a simple operation.
